

CONQUERING THE VPT IN MATH

VIRGINIA PLACEMENT TEST MATH PREP COURSE

What: NRCC's VPT Math Prep Course will help you prepare for the math portion of the placement test. You'll find an initial diagnostic test to see what you already know and can remember. Then, a personalized "Study Path" will be created for you to strengthen your skills. You'll watch videos, work on sample problems and take quizzes as you work your way through your Path.

Why: Your VPT Math score determines what type of math course you'll be placed in when you start taking classes at NRCC. It's important to be at the top of your game before you take the test.

This prep course will help you brush up on your skills and give you an idea of what to expect when you sit down to take the test. You can also use it if you're taken the VPT before and want to improve your score.

When: Whenever works for you. That's the beauty of this self-paced prep class.

Where: At home, at the coffee shop -- you decide! This easy-to-access online course gives you the freedom to work from anywhere with an internet connection.

How: Flip this card over for registration instructions.
