I. **Course Description**

Covers conic sections, polar and parametric equations, polar and parametric graphing, and calculus with vector valued functions. Designed for mathematical, physical, and engineering science programs. Prerequisite: 175, Co-requisite: MTH 176. Lecture 2 hours per week.

II. **Introduction**

This course covers analytical geometry topics of Calculus including parametric and polar forms as well as rectangular, polar and spherical coordinates.

III. **Student Learning Outcomes**

Upon successful completion of this course, the student will be able to:

1. Identify and sketch parabola.
2. Find the equation of parabola in applications.
3. Identify and sketch ellipses.
4. Find the equation of an ellipse in applications.
5. Identify and sketch hyperbola.
6. Find the equation of hyperbola in applications.
7. Find the equation of conic sections when translated.
8. Find the equation of conic sections when rotated.
9. Translate between rectangular and polar coordinates.
10. Sketch graphs in polar coordinates.
11. Find derivatives and integrals in polar coordinates.
12. Express plane curves in parametric form.
13. Find the length of plane curves.
14. Sketch vectors in the plane.
15. Express vectors in the plane in algebraic form.
17. Find curvature and acceleration of functions.
18. Define lines and curves in three-space.
19. Find velocity, acceleration, and curvature of functions in three-space.
20. Find the equation of a plane.
IV. **Instructional Methods**

The instructional methods include lectures, homework, quizzes, reviews and in class tests. Further information is available in the Course Plan Addendum.

V. **Instructional Materials**

**Textbook:** *Calculus: Early Transcendentals, 7th Edition*
James Stewart
Brooks/Cole, 2012

**WebAssign:** Enhanced WebAssign homework delivery system
bundled with the textbook if purchased through the NRCC Bookstore
to be purchased separately if a used book is purchased.

**Calculator:** See instructor specific requirements.
Cell phones may not be used as calculators.

VI. **Course Content**

- Conic sections including parabolas, ellipse, hyperbolas
- Rectangular, polar and spherical coordinates
- Parametric forms
- Vectors
- Lines, curves and planes in two and three space

VII. **Evaluation**

The grade for the course will be calculated from Homework, Quizzes and Tests. See the Course Plan Addendum for details.

VIII. **Attendance**

Regular attendance at classes is required. When absence from a class becomes necessary, it is the responsibility of the student to inform the instructor prior to the absence whenever possible. The student is responsible for the subsequent completion of all study missed during an absence. Any instruction missed and not subsequently completed will necessarily affect the grade of the student regardless of the reason for the absence.

IX. **Cheating Policy**

It is expected that all work completed in this course is the result of effort by the student registered in the course. If it is determined that the student registered for the course has cheated by obtaining unauthorized assistance on any of the graded components of the course, the student will receive an “F” for the course.
X. **Withdrawal Policy**

**Student Initiated Withdrawal Policy**

A student may drop or withdraw from a class without academic penalty during the first 60 percent of a session. For purposes of enrollment reporting, the following procedures apply:

a. If a student withdraws from a class prior to the termination of the add/drop period for the session, the student will be removed from the class roll and no grade will be awarded.

b. After the add/drop period, but prior to completion of 60 percent of a session, a student who withdraws from a class will be assigned a grade of “W.” A grade of “W” implies that the student was making satisfactory progress in the class at the time of withdrawal, that the withdrawal was officially made before the deadline published in the college calendar, or that the student was administratively transferred to a different program.

c. After that time, if a student withdraws from a class, a grade of “F” or “U” will be assigned. Exceptions to this policy may be made under documented mitigating circumstances if the student was passing the course at the last date of attendance.

A retroactive grade of “W” may be awarded only if the student would have been eligible under the previously stated policy to receive a “W” on the last date of class attendance. The last date of attendance for a distance education course will be the last date that work was submitted.

Late withdrawal appeals will be reviewed and a decision made by the Director of Student Services.

**No-Show Policy**

A student must either attend face-to-face courses or demonstrate participation in distance learning courses by the last date to drop for a refund. A student who does not meet this deadline will be reported to the Admissions and Records Office and will be withdrawn as a no-show student. No refund will be applicable, and the student will not be allowed to attend/participate in the class or submit assignments. Failure to attend or participate in a course will adversely impact a student’s financial aid award.

**Instructor Initiated Withdrawal**

A student who adds a class or registers after the first day of class is counted absent from all class meetings missed. Each instructor is responsible for keeping a record of student attendance (face-to-face classes) or performance/participation (DE classes) in each class throughout the semester.

When a student’s absences equal twice the number of weekly meetings of a class (equivalent amount of time for summer session), the student may be dropped for unsatisfactory attendance in the class by the instructor.
Since attendance is not a valid measurement for Distance Education (DE) courses, a student may be withdrawn due to non-performance. A student should refer to his/her DE course plan for the instructor’s policy.

In accordance with the No-Show Policy, a student who has not attended class or requested/accessed distance learning materials by the last day to drop the class and receive a refund must be withdrawn by the instructor during the following week. No refund will be applicable.

When an instructor withdraws a student for unsatisfactory attendance (face-to-face class) or non-performance (DE class), the last date of attendance/participation will be documented. Withdrawal must be completed within five days of a student’s meeting the withdrawal criteria. A grade of “W” will be recorded during the first sixty percent (60%) period of a course. A student withdrawn after the sixty percent (60%) period will receive a grade of “F” or “U” except under documented mitigating circumstances when a letter of appeal has been submitted by the student. A copy of this documentation must be placed in the student’s academic file.

The student will be notified of the withdrawal by the Admissions and Records Office. An appeal of reinstatement into the class may be approved only by the instructor.

XI. Disability and Diversity Statements

If you are a student with a documented disability who will require accommodation in this course, please register with the Disability Services Office located in the Counseling Center for assistance in developing a plan to address your academic needs.

The NRCC community values the pluralistic nature of our society. We recognize diversity including, but not limited to, race ethnicity, religion, culture, social class, age, gender, sexual orientation and physical or mental capability. We respect the variety of ideas, experiences and practices that such diversity entails. It is our commitment to ensure equal opportunity and to sustain a climate of civility for all who work or study at NRCC or who otherwise participate in the life of the college.
